

# FortiManager™

## Centralized Security Management

### Take Control of Your Security Infrastructure

The FortiManager family delivers the versatility you need to effectively manage your Fortinet-based security infrastructure. FortiManager drastically reduces management costs, simplifies configuration, and accelerates deployment cycles, whether you are deploying new devices, installing security policies, or distributing updates.

FortiManager also provides crucial timesaving features like device auto-discovery, group management, global policies, auditing facilities, and the ability to manage complex VPN environments. FortiManager, coupled with the FortiAnalyzer™ family of centralized logging and reporting appliances, provides a comprehensive and powerful centralized management solution for your organization.

### Key Features & Benefits

Integrated FortiAnalyzer Logging	This allows for a tighter integration and correlation of events and policies. A consolidated platform allows customers to more easily deploy Fortinet management products.
Hierarchical Objects Database	Facilitates reuse of common configurations across the organization in both local and global ADOM levels.
Automated Device Provisioning/ Centralized Policy Configuration	Reduces cost of deploying new FortiGate or FortiClient installations and maintains policies across all managed assets.
Role-Based Administration	Enables distributed administration, an important requirement for larger organizations.
Policy/Device Auditing	Allows you to prove compliance, and track any deviations from the required security policy.
In-View Policy Object Editing	Faster rulebase editing without opening new windows or changing context.
Device Profiles	Aids in mass provisioning of managed devices.
XML API	Web Services interface that enables users to integrate with provisioning systems and automate the configuration of the many devices that FortiManager is capable of managing.
JSON API	JSON API allows MSSPs to offer administrative web portals to customers.

### Fortinet's Versatile Management Solution

Networks are constantly evolving due to threats, organizational growth or new regulatory/business requirements. Traditional management products focus on mitigating company-wide threats through firewall policies, firmware updates and keeping content security current.

FortiManager offers enterprise class features to contain these threats, but also provides flexibility to evolve along with your ever-changing network. In addition to being able to manage hundreds or even thousands of FortiGate devices, FortiManager now includes basic FortiAnalyzer logging and reporting functions for administrators who prefer a consolidated management platform.

Key tenets of Fortinet's management versatility:

- Diversity of form factors
- Architectural flexibility
- Highly customizable
- Simple licensing

# HIGHLIGHTS

## Administrative Domains (ADOMs) and Global Policy

Enables a primary administrator to create groups of devices for other administrators to monitor and manage

- Administrators can manage devices in their geographic location or business division
- Multiple FortiGate virtual domains (VDMs) can be divided among multiple ADOMs
- Granular permissions allow assigning ADOMs and policies to particular users
- Administrators can only access devices or VDMs assigned to them
- Create device configuration templates to quickly configure a new Fortinet appliance
- Within each ADOM, there is a common database of objects shared by all devices and policy packages allowing users to reuse similar configurations among a group of managed assets
- Global Policy capabilities are available on all FortiManager hardware models and virtual machines

## JSON and XML (Web Services) APIs

- JSON API — Allows MSSPs/large enterprises to create customized, branded web portals for policy and object administration
- XML API — Enables administrators to automate common tasks such as provisioning new FortiGates and configuring existing devices

## Fortinet Developer Network (FNDN)

Access tools, sample code, documentation and interact with the Fortinet developer community by subscribing to the Fortinet Developer Network.

Note: With the purchase of a FortiManager 1000 series or above, customers receive a complimentary 90 day trial access to FNDN.

## Locally Hosted Security Content

Hosting security content locally allows the administrator greater control over security content updates and provides improved response time for rating databases. Includes support for:

- Antivirus definition updates
- Intrusion Prevention updates
- Vulnerability and Compliance Management updates
- Web Filtering (select systems)
- Antispam (select systems)

## Command and Control

- Manage devices and endpoint agents individually or as logical groups
- Update device firmware
- Discover new devices automatically
- Create, deploy, and monitor virtual private networks
- Delegate control to other users with distributed administration features
- Audit configuration changes to ensure compliance

## Monitor, Analyze and Report

- Access vital security and network statistics
- Real-time monitoring and integrated basic reporting provide visibility into network and user activity.
- For more powerful analytics, combine with a FortiAnalyzer appliance for additional data mining and graphical reporting capabilities

## FortiManager Supported Devices

- FortiGate and FortiCarrier Consolidated Security Appliances
- FortiAP Wireless Access Points
- FortiMail Messaging Security Systems
- FortiWeb Web Application Security
- FortiAnalyzer Reporting and Analysis Appliances
- FortiSwitch ATCA Switching Platforms

## ORDER INFORMATION

ADDITIONAL FORTIMANAGER ITEMS	
SKU	Description
FC-10-FNDN1-139-01-12	1 Year Subscription for 1 User to Fortinet Developer Network
FC-10-FNDN2-139-02-12	1 Year Subscription for Unlimited Users to Fortinet Developer Network

FORTIMANAGER VIRTUAL APPLIANCES		
SKU	Licensed Network Devices (Max)	Description <sup>4</sup>
Built-in Evaluation	10	Built-in 15-day EVAL license, no activation required.
Full Evaluation (60-days)	10,000	EVAL license. License and activation required.
FMG-VM-Base	10	Base license for stackable FortiManager VM. Manages up to 10 FortiGate devices/Administrative Domains; 1 GB/day of logs and 100 GB device quota. Designed for AWS, VMware vSphere and Microsoft Hyper-V platforms.
FMG-VM-10-UG	+10	Upgrade license for adding 10 FortiGate devices/Administrative Domains; allows for total of 2 GB/day of logs and 200 GB device quota.
FMG-VM-100-UG	+100	Upgrade license for adding 100 FortiGate devices/Administrative Domains; allows for total of 5 GB/day of logs and 1 TB device quota.
FMG-VM-1000-UG	+1,000	Upgrade license for adding 1,000 FortiGate devices/Administrative Domains; allows for total of 10 GB/day of logs and 4 TB device quota.
FMG-VM-5000-UG	+5,000	Upgrade license for adding 5,000 FortiGate devices/Administrative Domains; allows for total of 25 GB/day of logs and 8 TB device quota.
FMG-VM-U-UG	Unrestricted <sup>5</sup>	Upgrade license for adding unlimited FortiGate devices/Administrative Domains; allows for total of 50 GB/day of logs and 16 TB device quota.

<sup>4</sup> Unlimited virtual CPUs. Memory is not restricted up to the operating system limit of 4 GB (32-bit) / Unlimited (64-bit)

<sup>5</sup> Limited in software to 10,000 devices, ADOMs, Web Portals, and Web Portal users.

**FortiGuard® Security Subscription Services** deliver dynamic, automated updates for Fortinet products. The Fortinet Global Security Research Team creates these updates to ensure up-to-date protection against sophisticated threats. Subscriptions include antivirus, intrusion prevention, web filtering, antispam, vulnerability management, application control and database security services.

**FortiCare™ Support Services** provide global support for all Fortinet products and services. FortiCare support enables your Fortinet products to perform optimally. Support plans start with 8x5 Enhanced Support with “return and replace” hardware replacement or 24x7 Comprehensive Support with advanced replacement. Options include Premium Support, Premium RMA, and Professional Services. All hardware products include a 1-year limited hardware warranty and 90-day limited software warranty.

**Fortinet® Developer Network** is subscription-based advanced support for Fortinet products, geared towards application and integration developers. This service covers advanced topics like the FortiManager™ Web Portal and XML APIs. Includes best practices, example code, and community-built management tools.
